

Test Summary Report

Project: Edulearn Platform
Tester: Monday Confidence
Test Type: Manual Testing (Functional & End-to-End Testing)
Modules Tested: Chat and Messaging, Platform Settings
Environment: Web (Chrome)
Test Duration: 4 Days (Feb 16 - Feb 20)

1. Execution Overview

- Total Test Cases Designed: 14
- Total Test Cases Executed: 13
- Not Implemented: 1

Execution Results

Status	Count
Pass	4
Fail	9
Not Tested	0
Not Implemented	1

2. Defect Severity Coverage

Based on identified defects and priorities:

Severity Level	Description
P0 (Critical)	Core functionality affecting feature usability

P1 (High)	Incorrect navigation and broken interactions
P2 (Medium)	UI inconsistencies and feedback gaps

3. Key Functional Gaps Identified

A. Chat and Messaging Issues

- Incorrect icon behavior leading to unintended pages.
- Navigation inconsistencies
- Message interaction reliability concerns
- Feature behavior not aligned with expected user actions

B. Platform Settings Issues

- Configuration changes not persisting after saving
- Lack of confirmation feedback after updates
- Data reverting to default after page reloads

C. Payment/ Platform Behavior Issues

- User interaction flow confusion
- Incomplete feedback during actions

4. Overall Quality Assessment

The platform demonstrates foundational functionality; however, multiple defects were identified that impact usability and reliability.

The system requires defect resolution and retesting before production-level deployment.

5. Recommendations

- Fix identified defects
- Perform regression testing
- Conduct user acceptance UAT
- Validate stability across browsers and devices.
